

We've taken bag-in-box to a whole new dimension.

SPACEKRAFT. From in-house processing to worldwide export.

SpaceKraft comes with easy-to-use cassettes holding FDA and USDA food grade liners. Also available: Kosher food grade liners and coextruded liners for specific barrier needs, including aseptic.

EASY SETUP

It takes one person just one minute.

FAST FILLING

To fill, connect a hose to the liner and place it in the bottom of the bin. As it fills, it rises to the top, where it is capped closed.

◆ **Superior strength and durability.** A seamless container of seven to ten-ply construction with compression strength from 18 to 37 tons.

◆ **Reduced time and labor,** because there's just one container to handle.

◆ **Higher stacking.** SpaceKraft® for liquids stack up to five high.

◆ **Easy disposability.** SpaceKraft® IBCs meet all disposal regulations and are completely recyclable.

◆ **Range of sizes.** SpaceKraft® IBCs hold from 220 to 330 gallons or 1,000 liters for export.

EMPTYING CHOICES

Empty by pumping from the top or draining from the side.

EXPORT

This rugged IBC is popular for export shipments to countries where environmental laws are strict and container disposal can be a costly proposition.

- **Seven times the insulation** factor of drums for superior protection during transit under extremely hot or cold conditions.
- **Ship 20% more product** in the same space required for drums.

SpaceKraft is being used for both domestic and international shipping of wine, grape juice, grape must, grape concentrate, and as a food ingredient.
